**LEARNING, TEACHING AND ASSESSMENT INFORMATION**

<b>6a. Module Description</b>
<p>This module is a study of basic financial management strategy and more detailed operational financial management issues. The module begins by introducing financial management strategies such as maximisation of shareholder wealth and long term growth. The topic of financial management is placed in the context of the economic environments and financial markets in which businesses operate. The focus of the module is the three fundamental financial management decisions of investing, financing and dividend policy. Investing decisions are considered firstly in terms of long-term investment appraisal and secondly in terms of controlling the investment in working capital. Financing decisions are considered from the point of view of both the recipient and the provider of finance. From the recipients viewpoint there is a study of the sources of business finance, the cost of this finance and other factors which affect the type of finance selected to be used by a business. From the providers viewpoint there is a study of the models used to value both equity and debt finance including a consideration of possible methods used for the valuation of a business. The module concludes with an introduction to treasury risk management. Assessment will be by a written midterm assignment and a final examination. Both will contain both quantitative and qualitative components. This module will develop employability skills relevant to a finance manager who is responsible for the finance function of a business. Multiculturalism has also been considered during the design of this module.</p>

<b>6b. Outline Content</b>
-Financial objectives; shareholder wealth maximisation -Macroeconomic policy targets -The functions of a stock market and corporate bond market -Investment appraisal, discounted and non-discounted cash flow techniques -Working capital needs and management - Sources of finance, the cost of capital and capital structure -Business Valuations -Exchange rate and interest rate risks and hedging techniques
