Fees	£9,250 per annum
Location	London

About this course

A degree in finance and accounting has long been viewed as an excellent grounding for a career in business, regardless of whether you intend to become a professionally qualified accountant or not.

For students that are already considering undertaking a professional accounting qualification, this course has been structured to provide the maximum possible number of exemptions (9 foundations papers in total) from the professional examinations of the Association of Chartered Certified Accountants (ACCA), the global body for professional accountants.

Whether you want to move into auditing, financial reporting, management accounting or financial services, this could be the course for you. You'll develop subject-specific skills alongside important transferable skills like communication, enterprise, problem-solving and quantitative analysis.

The course syllabus has also been carefully designed to combine both theoretical and practical aspects of finance and accountancy. This enables students to gain an excellent grounding in accounting and finance tools and techniques, together with the wider understanding and real-world insights required by all finance professionals.

- Tax Adviser
- Forensic Accountant

It was a challenge, working all year despite the pandemic, but I gained practical knowledge and completed my studies. It was very rewarding as I was taught by very dedicated, experienced teachers and specialists, and was able to learn from their wealth of industry experience.
